The purpose of the City of Adelaide's new Resource Recovery (Organics, Recycling and Waste) Strategy 2020–2028 is to provide a solid framework to redefine the concept of waste, improve resource recovery and build a circular economy in the City of Adelaide.

This document is the related Action Plan, which establishes how the Resource Recovery Vision will be achieved.

It outlines programs, projects and initiatives that will be developed over the next eight years. As the waste and recycling industry is dynamic, it is intended that this Action Plan will be reviewed annually for relevance and applicability.

Our vision for resource recovery – an overview

The City of Adelaide's Resource Recovery Vision is to be the first city in Australia to achieve 'zero avoidable waste to landfill' ('zero-waste').

Aligning with the State Government's target, this equates to: 'the diversion of all waste from landfill where it is technologically, environmentally and economically practicable to do so. 'Unavoidable' waste therefore refers to wastes for which no other current treatment is available including (but not limited to) asbestos, toxic and quarantine waste.'¹

This vision will guide the City of Adelaide through to 2028 and will promote a circular economy through reducing waste, increasing resource recovery and delivering exceptional customer service that is:

Customer-centric

- Responsive
- **Evidence-based**
- Collaborative
- Equitable
- Innovative

This vision for a system that is centred on resource recovery centric system is guided by a strong strategic framework and action plan that is funded by an adequate budget. Achieving the vision will establish the City of Adelaide as a world-class resource recovery leader by redefining what waste is, establishing an integrated system of recovery, and building the supporting networks to deliver a circular economy and a 'zero-waste' city.

The City of Adelaide's Resource Recovery Vision of 'zero-waste' is measured by the following:

- Divert 75 percent of residential kerbside waste from landfill
- Divert 90 percent of waste from City of Adelaide activities and events from landfill
- Reduce waste generation by 5 percent per capita
- Reduce contamination to below 10 percent in kerbside collected yellow co-mingled recycling
- Reduce food waste in the kerbside residential waste bin by 50 percent
- Apply the waste management hierarchy in all actions, and consider material safety.

The Strategy

RESOURCE RECOVERY VISION

5 PRIORITY AREAS

5 TARGET AREAS

KEY ACTIONS

Resource Recovery

Vision: where we see the City of Adelaide's future of resource recovery. **Priority Items:** items that are critical to the achievement of the resource recovery vision are woven into every program created in support of this strategy. **Target Areas:** the major sectors or stakeholders within the city for which programs will be created. These sectors and stakeholders have varying needs and requirements and require a tailor-made approach for best resource recovery outcomes. **Key Actions:** a set of tasks and projects that are specific to the five Target Areas and that integrate the goals set out in the Priority Items.

Key Actions Matrix	Priority Item 1: Eliminate food waste	Priority Item 2: Engage, educate and inspire
This matrix includes the high-level and sub-actions to be executed over the duration of the strategy and will be reviewed annually.	Reduce food waste generation and increase diversion of food scraps going to landfill by 50 percent.	Drive robust waste management education to all residents, businesses and users of our city.
Target Area 1: Residents and the community Support residents and the community using the residential kerbside collection to achieve zero-waste at home.	1.1 Provide residents, community members and community event organisers with the tools and services to eliminate food from the waste stream. 1.1.1 Investigate and remove the barriers to adopting the green organics service.	2.1 Develop and provide a multi-faceted, multi-lingual suite of educational resources for residents, community and community events organisers to reduce waste generation and increase resource recovery.
	1.1.2 Increase accessibility to green organics bins, kitchen caddies, certified compostable liner bags, education and other tools that support reduction of	2.1.1 Develop a new information and education program for residents using the three bin kerbside system. Include collateral, signage and information sessions.
	food waste. 1.1.3 Develop, implement and fund projects and campaigns targeting the items that do not belong in the red waste bin (such as food waste), to increase recovery of these materials.	2.1.2 Develop partnerships and collaboration with other councils, organisations, industry, academia and different levels of government to deliver unique programs, strengthen and unite waste reduction initiatives, and recognise high achievers in waste diversion.
		2.1.3 Offer regular outreach, education events, information sessions and recycling tours for residents and elected members.
		2.1.4 Support and implement community programs targeting waste avoidance, reduction and reuse (e.g. repair cafés, lending libraries, ambassador programs).
Target Area 2: Residents in multi-unit dwellings Tailor supportive services to residential multi-unit dwellings (including apartments, low-rises and high	1.2 Provide multi-unit dwelling building owners, managers and residents with tailored waste management solutions that target elimination of	2.2 Develop and provide a multi-lingual waste management education toolkit for building managers and residents.
rises) in development and through to occupancy.	food from the waste stream. 1.2.1 Identify the challenges associated with food waste diversion in multi-unit-dwellings, and tailor programs to address these challenges.	2.2.1 Develop and deliver multi-lingual education toolkits and printable materials accessible on the City of Adelaide's website for residents and building personnel.
	1.2.2 Increase accessibility to murfes (small recycling bins), kitchen caddies, certified compostable liner bags, education and other tools specific to	2.2.2 Support residents with at-home waste management through education information sessions for residents and building personnel.
	multi-unit dwellings. 1.2.3 Develop and implement projects and campaigns targeting items that do not belong in the shared bulk red waste bin (such as food waste) to increase recovery of these materials.	2.2.3 Develop an ambassadors program, build relationships and recognise high achievers in waste reduction and diversion.
Target Area 3: Businesses	1.3 Investigate and provide green organics collection service and tools to businesses with a	2.3 Develop and provide multi-lingual targeting waste management best practices for business
Expand support for businesses eligible for kerbside collection.	City of Adelaide kerbside collection service. 1.3.1 Explore and implement innovative solutions for	2.3.1 Consider and develop methods for incentivisation for reduction and diversion of waste.
	green waste diversion for commercial enterprises (e.g. precinct based collection). 1.3.2 Support businesses to operate more sustainably, including transitioning from single use	2.3.2 Offer regular information meetings for businesses to assist them in establishing or maintaining good waste management practises. Consider links to existing programs such as the
	plastics to reusable containers or compostable serve-ware, and implementing a green organics service.	Sustainability Incentives Scheme (SIS). 2.3.3. Recognise high achievers in waste reduction and diversion.
Target Area 4: Public spaces	1.4 Investigate the collection of organic materials in public spaces.	2.4 Create a consumer-centric public space waste management systems that is consistent with the
Establish public space such as streets and Park Lands as conduits for resource recovery.	1.4.1 Investigate and facilitate collection of food waste and compostable products (green organics) and dog waste in the public space.	three stream system. 2.4.1 Increase visibility and consistency of signage relating to waste, recycling and organics bins.
	1.4.2 Facilitate the distribution of Australian certified compostable dog waste bags in the public space.	2.4.2 Facilitate unique engagement and events to support public place waste education.
Target Area 5: City of Adelaide own operations Establish the City of Adelaide's own operations,	1.5 Mandate diversion of all food waste and compostable products from the City of Adelaide's own operations, buildings and tenants and	Establish resource recovery as part of workplace culture in City of Adelaide properties, rentals, leases, and facilities.
businesses, facilities and events as visible leaders in exceptional waste management.	provide support and services to achieve this. 1.5.1 Facilitate and mandate diversion of all food waste from City of Adelaide's own operations, buildings and tenants.	2.5.1 Create an education program (including onboarding, ongoing training, program execution and maintenance) to support employees and visitors to improve waste avoidance, reduction
	1.5.2 Ban the use of single-use plastic serve-ware and replace with alternatives such as reusable containers and Australian certified compostable serve-ware.	and diversion. 2.5.2 Install visible and consistent bin signage on public place and event bins and internally in City of Adelaide operations and community centres.
	1.5.3 Measure, audit and assess food waste generation for food waste reduction opportunities.	2.5.3 Establish waste management program (modelling from the Workplace Safety Program).

Priority Item 3: Foster innovation, new technologies, and	Priority Item 4: Prioritise and centralise resource recovery	Priority Item 5: Advocate and align policies, guidelines and
data collection		practices to the circular economy
Collaborate with industry, academia and	Support methods to establish waste avoidance and reduction and improved resource recovery as	Work internally and externally with different levels

Key actions over time

	esidents and the community he community using the residential kerbside collection t home.	Quick Win	2020- 2022	2023- 2025	2026- 2028
Priority Item 1: Eliminate food waste	1.1 Provide residents, community members and community event organisers with the tools and services to eliminate food from the waste stream.	٠	٠	•	•
Reduce food waste	1.1.1 Investigate and remove the barriers to adopting the green organics service.	٠	٠		
generation and increase diversion of food scraps going to landfill by 50 percent.	1.1.2 Increase accessibility to green organics bins, kitchen caddies, certified compostable liner bags, education and other tools that support reduction of food waste.		•		
Jo percent.	1.1.3 Develop, implement and fund projects and campaigns targeting the items that do not belong in the red waste bin (such as food waste), to increase recovery of these materials.		•	•	
Priority Item 2: Engage, educate, and inspire Drive robust waste	2.1 Develop and provide a multi-faceted, multi-lingual suite of educational resources for residents, community and community event organisers to reduce waste generation and increase resource recovery.	•	•	•	•
management education to all residents, businesses	2.1.1 Develop a new information and education program for residents using the three bin kerbside system. Include collateral, signage and information sessions.	•	•		
and users of our city.	2.1.2 Develop partnerships and collaborations with other councils, organisations, industry, academia and varying levels of government to deliver unique programs, strengthen and unite waste reduction initiatives, and recognise high waste diversion achievers.	•	•	•	•
	2.1.3 Offer regular outreach, education events and information sessions and recycling tours for residents and elected members.	•	•	•	•
	2.1.4 Support and implement community programs targeting waste avoidance, reduction and reuse (e.g. repair cafés and lending libraries, ambassador programs).	•	•	•	•
Priority Item 3: Foster	3.1 Establish data collection methods for resource recovery and cost signalling mechanisms linked to waste disposal.	٠	٠	•	٠
innovation, new technologies, and data collection Collaborate with industry,	3.1.1 Support and implement innovative technology and behaviour change to deliver improved municipal resource recovery systems and infrastructure (for example, investigate kerbside bin size options).			•	•
academia and entrepreneurs to develop innovative solutions and data collection methods	3.1.2 Investigate methods to install data collection methods (for example, radio-frequency identification (RFID) tags on all City of Adelaide kerbside bins) to provide ongoing feedback and improve service outcomes, communicate feedback to residents and target resource recovery behaviours.		•	•	
to reach the resource recovery vision.	3.1.3 Conduct regular comprehensive waste audits and report publicly on results. (Data should be collected in a way that is useful cross-program for example the Carbon Neutral Adelaide program).		•	•	•
	3.1.4 Facilitate additional collection locations for hard-to-recycle items for residents to access (for example within City of Adelaide facilities and community centres).		•	•	•
Priority Item 4: Prioritise and centralise	4.1 Increase visibility of the associated cost and volume of residential waste and of the benefits of adopting the circular economy.	•	•	•	•
resource recovery	4.1.1 Investigate decoupling waste fees from rates for clarity of cost.			•	
Support methods to establish waste avoidance and reduction and improved resource	4.1.2 Establish incentives programs, or financial models to encourage reduction of waste generation. For example, financial incentives, alternative collection service frequencies, bin sizes, service cost models and other behaviour-change tactics that encourage waste reduction and source separation.		•	•	
recovery as central in business decision making, development applications,	4.1.3 Target and clarify misinformation and provide clarity regarding resource recovery.	•	•		
building plans, product design, manufacturing and waste systems design.	4.1.4 Provide resources for at-home waste avoidance, reduction and management.		•	•	
Priority Item 5: Advocate and align policies,	5.1 Drive initiatives and advocacy in our local communities to position the City of Adelaide as a leader in resource recovery.	•	•	•	•
guidelines and practices to the circular economy Work internally and	5.1.1 Advocate for the development and improvement of policies, and guidelines that support the consumer enact the circular economy, product stewardship, and waste avoidance/reduction/diversion.	•	•	•	•
externally with different levels of government to drive long term fundamental	5.1.2 Advocate for changes to legislation that prioritises material recovery services over waste services.	•	•	•	•
change in consumption and waste management.	5.1.3 Develop new City of Adelaide policy and guidelines for kerbside collection that align to this strategy.		•	•	

8

	es to residential multi-unit dwellings (including apartments, low-rises opment through to occupancy.	Win	2022	2025	2028
Priority Item 1: Eliminate food waste Reduce food waste	1.2 Provide multi-unit dwelling building owners, managers and residents with tailored waste management solutions that target elimination of food from the waste stream.	•	•	•	•
generation and increase diversion of food scraps	1.2.1 Identify the challenges associated with food waste diversion in multi-unit- dwellings, and tailor programs to address these challenges.		٠		
going to landfill by 50 percent.	1.2.2 Increase accessibility to murfes (small recycling bins), kitchen caddies, certified compostable liner bags, education and other tools specific to multi- unit dwellings.		٠		
	1.2.3 Develop and implement projects and campaigns targeting items that do not belong in the shared bulk red waste bin (such as food waste) to increase recovery of these materials.		•	•	
Priority Item 2: Engage, educate, and inspire	2.2 Develop and provide a multi-lingual waste management education toolkit for building managers and residents.	•	•	•	•
Drive robust waste management education to all residents, businesses	2.2.1 Develop and deliver multi-lingual education toolkits and printable materials accessible on the City of Adelaide's website for residents and building personnel.	•	•		
and users of our city.	2.2.2 Support residents with at-home waste management through education information sessions for residents and building personnel.		•		
	2.2.3 Develop an ambassadors program, build relationships and recognise high achievers in waste reduction and diversion.		•	•	
Priority Item 3: Foster innovation, new	3.2 Establish behaviour feedback mechanisms through data collection methods specific to multi-unit dwellings.	٠	٠	•	•
Innovation, new technologies, and data collection Collaborate with industry, academia and entrepreneurs to develop innovative solutions and data collection methods to reach the resource recovery vision.	3.2.1 Facilitate regular assessments and audits of multi-unit dwellings to ensure measurable and verifiable improvements to waste management. Report progress to residents, building management and other associated stakeholders.			•	
	3.2.2 Investigate ongoing data collection methods (for example, radio-frequency identification (RFID) tags on bulk bins) to improve service outcomes, communicate feedback and resident behaviours.		•	•	
Priority Item 4: Prioritise and centralise	4.2 Centralise best practice waste management decisions at development phase, during build and in occupancy phases.	•	•	•	•
and centralise resource recovery Support methods to establish waste avoidance and reduction and improved resource recovery as central in business decision making, development applications, building plans, product design, manufacturing and waste systems design.	4.2.1 Facilitate and provide guidance in the form of a resource on waste management best practises for all new development applications so that waste management is prioritised early on in development, during build, and during occupation.		•	•	٠
	4.2.2 Provide assistance for existing developments to access waste management best practises to enhance or support existing or new waste management systems.			•	•
	4.2.3 Transition multi-unit buildings to a shared three bin system, where appropriate.		•	•	•
Priority Item 5: Advocate and align policies, guidelines and practices to the circular economy Work internally and externally with different levels of government to drive long term fundamental change in consumption and waste management.	5.2 Drive initiatives and advocacy for improvements to waste management for multi-unit dwellings to enable the city to be a vehicle for resource recovery.	•	•	•	•
	5.2.1 Advocate for policies and guidelines that prioritise waste avoidance and diversion and associated user behaviour in building design, occupancy and building management.	•	•	•	•
	5.2.2 Develop new City of Adelaide policies and guidelines for waste management that align to this strategy for City of Adelaide serviced multi- unit dwellings.	•	•	•	•

Target Area 3: B Expand support for busi	USINESS nesses eligible for kerbside collection.	Quick Win	2020- 2022	2023– 2025	2026 2028
Priority Item 1: Eliminate ood waste	1.3 Investigate and provide agreen organics collection service and tools to businesses with a City of Adelaide kerbside collection service.	٠	•	•	•
Reduce food waste generation and increase	1.3.1 Explore and implement innovative solutions for green waste diversion for commercial enterprises (e.g. precinct based collection).		٠	•	
liversion of food scraps going to landfill by 50 percent.	1.3.2 Support businesses to operate more sustainably, including transitioning from single use plastics to reusable containers or compostable serve-ware, and implementing a green organics service.		•	•	
Priority Item 2: Engage, educate, and inspire	2.3 Develop and provide multi-lingual information targeting waste management best practices for business.	•	•	•	•
Drive robust waste management education to	2.3.1 Consider and develop methods for incentivisation for reduction and diversion of waste.		•	•	•
all residents, businesses and users of our city.	2.3.2 Offer regular information meetings for businesses to assist them in establishing or maintaining good waste management practises. Consider links to existing programs such as the Sustainability Incentives Scheme (SIS).		•	•	
	2.3.3 Recognise high achievers in waste reduction and diversion.		•	٠	
Priority Item 3: Foster innovation, new technologies, and data collection Collaborate with industry, academia and entrepreneurs to develop	3.3 Partner with circular economy businesses to encourage waste reduction and resource sharing for businesses.	•	•	•	
	3.3.1 Investigate and implement innovative technology and data collection methods to improve service outcomes, communicate feedback to businesses (i.e. RFID, precinct-based waste management, high performers recognition programs).			•	•
nnovative solutions and data collection methods to reach the resource recovery vision.	3.3.2 Consider collaboration with organisations and other innovative programs (for example, Carbon Neutral Partners and City Switch programs) to drive unique and innovative solutions to resource recovery challenges.		•	•	•
Priority Item 4: Prioritise and centralise resource recovery Support methods to establish waste avoidance and reduction and improved resource recovery as central in business decision making, development applications, building plans, product design, manufacturing and waste systems design.	4.3 Establish protocols that stipulate robust resource management plans must be approved and contingent to a business opening.	•	•	•	•
	4.3.1 Position Council as an ally that businesses can rely on for waste management best practices.			•	•
	4.3.2 Establish protocols to evaluate businesses on their resource recovery practises based on their resource recovery plans.			•	•
	4.3.3 Work with businesses across the city to improve waste and waste bin amenity.		٠	•	•
guidelines and practices to the circular economy Work internally and externally with different levels of government to drive long term fundamental change in consumption	5.3 Advocate for improvements in policy and legislation related to business and industry that support the circular economy.	•	•	•	
	5.3.1 Work with and advocate for improvements to the waste system and infrastructure.	٠	•	•	•
	5.3.2 Advocate for improvements in legislation surrounding accountability in material use/design, lifecycle which support the circular economy.	٠	•	•	
	5.3.3 Develop new policy and guidelines for waste management for kerbside collection for businesses that align to this strategy.		•	•	

Target Area 4: P Establish public space li	Public spaces ke streets and Park Lands as conduits for resource recovery.	Quick Win	2020- 2022	2023– 2025	2026 2028
Priority Item 1: Eliminate food waste	1.4 Investigate the collection of organic materials in public spaces.	٠	٠	٠	•
Reduce food waste generation and increase	1.4.1 Investigate and facilitate collection of food waste and compostable products (green organics) and dog waste in the public space.			•	•
diversion of food scraps going to landfill by 50 percent.	1.4.2 Facilitate the distribution of Australian certified compostable dog waste bags in the public space.		•	•	•
Priority Item 2: Engage, educate, and inspire Drive robust waste	2.4 Create a consumer-centric public space waste management system that is consistent with the three-stream system.	•	•	•	•
management education to all residents, businesses	2.4.1 Increase visibility and consistency of signage relating to waste, recycling, organics bins.		•	•	
and users of our city.	2.4.2 Facilitate unique engagement and events to support public place waste education.		•	•	
Priority Item 3: Foster innovation, new technologies, and data	3.4 Leverage opportunities in public spaces to drive resource recovery through lifecycle thinking and technological innovation.	٠	٠	•	•
collection Collaborate with industry, academia and entrepreneurs to develop innovative solutions and data collection methods to reach the resource recovery vision.	3.4.1 Investigate innovations in public places such as streets and the Park Lands and including City of Adelaide hire, lease, and rental spaces (i.e. pet waste, club, sporting organisation waste) through collaborations with industry and academia.			•	•
	3.4.2 Execute regular data collection and auditing of innovation implementation to measure ongoing progress. Report progress publicly.			•	•
Priority Item 4: Prioritise and centralise resource recovery Support methods to establish waste avoidance and reduction and improved resource recovery as central in business decision making, development applications, building plans, product design, manufacturing and waste systems design.	4.4 Centralise waste management decisions in assets and infrastructure projects.	•	•	•	•
	4.4.1 Investigate building a consistent resource recovery system (residential, workplaces, public spaces etc) to support a consumer centric approach.			•	•
	4.4.2 Prioritise projects and materials that utilise recycled content (for example, recycled roads).			•	•
Priority Item 5: Advocate and align policies,	5.4 Drive the circular economy through collaboration.	٠	•	•	•
guidelines and practices to the circular economy Work internally and externally with different levels of government to drive long term fundamental change in consumption and waste management.	5.4.1 Facilitate collaboration with other councils to develop a consistent methodology for waste particularly in the public realm.	•	•	•	•
	5.4.2 Investigate place-based waste generation to assist with reduction at touch point (i.e. link between cafés and nearby public bins).			•	

	City of Adelaide own operations elaide's own operations, businesses and facilities as a visible leader in agement.	Quick Win	2020- 2022	2023– 2025	2026- 2028
Priority Item 1: Eliminate food waste Reduce food waste	1.5 Mandate diversion of all food waste and compostable products from the City of Adelaide's own operations, buildings and tenants and provide support and services to achieve this.	٠	•	•	•
generation and increase diversion of food scraps	1.5.1 Facilitate and mandate diversion of all food waste from City of Adelaide's own operations, buildings and tenants.		٠	•	•
going to landfill by 50 percent.	1.5.2 Ban the use of single-use plastic serve-ware and replace with alternatives such as reusable containers and Australian certified compostable serve-ware.		•	•	•
	1.5.3 Measure, audit and assess food waste generation for food waste reduction opportunities.		•	•	
Priority Item 2: Engage, educate, and inspire	2.5 Establish a resource recovery as part of workplace culture in City of Adelaide properties, rentals, leases, and facilities.	•	•	•	•
Drive robust waste management education to all residents, businesses and users of our city.	2.5.1 Create an education program (including onboarding, ongoing training, program execution and maintenance) to support employees and visitors to improve waste avoidance, reduction and diversion.	•	•		
and users of our city.	2.5.2 Install visible and consistent bins and bin signage on public place and event bins and internally in City of Adelaide operations and community centres.		•	•	
	2.5.3 Establish a waste management program and resource recovery plan for each City of Adelaide site and facility. (Modelling from the Workplace Safety Program.)	•	•	•	
Priority Item 3: Foster innovation, new technologies, and data collection Collaborate with industry, academia and entrepreneurs to develop innovative solutions and data collection methods to reach the vision.	3.5 Establish data collection methods and ensure data is linked to key roles for sustained resource recovery.			•	•
	3.5.1 Investigate and implement innovative solutions for hard waste and illegal dumping.			•	•
	3.5.2 Facilitate additional collection points for hard-to-recycle products for non commercial users to access.		•	•	•
Priority Item 4: Prioritise and centralise resource recovery Support methods to establish waste avoidance and reduction and improved resource recovery as central in business decision making, development applications, building plans, product design, manufacturing and waste systems design.	4.5 Review resource recovery programs annually and establish adequate funding and resources to support strategy goals.	•	•	•	•
	4.5.1 Develop protocols for City of Adelaide undertakings (internal operations, assets, infrastructure projects, capital projects, and procurement) to consider the effects of waste in all activities.			•	•
	4.5.2 Execute regular data collection and auditing to measure ongoing progress. Report progress to internal staff.		•	•	•
	4.5.3 Review Action Plan annually and budget for sustainability and continuity.		•	•	•
Priority Item 5: Advocate and align policies, guidelines and practices to the circular economy	5.5 Review internal City of Adelaide policies and guidelines to ensure alignment to this strategy and long-term vision.	•	•	•	•
	5.5.1 Consolidate similar services for efficiency and best value and ensure that contracts require data collection. Review contracts regularly for fit for purpose.	•	•	•	•
Work internally and externally with different	5.5.2 Review City of Adelaide internal waste management guidelines, policies and by-laws.		•	•	
levels of government to drive long term fundamental change in consumption and waste management.	5.5.3 Develop protocols to ensure procurement avoids waste, is made with sustainably, can be reused, recycled or composted at end of life. Favour companies that have product stewardship or extended producer responsibility policies in place.	•	•	•	•

Glossary

Bulk bin/shared bulk bin: a larger bin, usually on four wheels, that collects waste, recycling or organics, depending on the lid colour. These bins are often used for multi-unit dwellings, large office buildings or commercial complexes that share a collection service.

Circular economy: a methodology to use resources in a cyclical manner, effectively removing the concept of 'waste'.

Co-mingled recycling: a collection of recyclable materials like glass, tin cans and paper that are taken to a material recovery facility for sorting and recycling.

Food organics: Food scraps and waste collected for composting.

Green organics bin: a bin used to collect food waste and garden organic materials to be processed into composting. (also FOGO: Food Organics, Garden Organics, is also a frequently used term to describe food and garden waste in a green organics kerbside system).

Hard-to-recycle: products that are recyclable, however should not be placed in the kerbside comingled recycling stream. These products are made of several materials and need to be dismantled before recycling can occur.

Key actions: a set of tasks and projects specific to the five Target Areas.

Recycling: the process of converting 'waste' materials like plastic containers, metals and paper into reusable materials.

Red waste bin: a bin used to collect residual waste, garbage or rubbish. Often used as the 'catch-all' bin, where many materials can be recycled or composted.

Resource Recovery Vision: The City of Adelaide's long-term aim.

Priority Items: initiatives that are critical to the achievement of the Resource Recovery Vision. They are woven into every program created in support of this Strategy.

Target Areas: the major sectors or stakeholders within the city which programs and projects will be directed.

Waste avoidance: avoiding consumption that results in the production of waste.

Waste diversion: recovering materials that can be recycled so that they do not end up in landfill.

Waste generation: the process of making waste.

Waste management/resource recovery system: the actions needed to manage waste from generation to disposal; a waste management system that prioritises recycling and reuse of materials, rather then sending to landfill.

Yellow co-mingled recycling bin: a bin used to collect co-mingled recycling (see co-mingled recycling definition).
